Hello,

I would like the subcommittee to look at the information above in regard to cost categories of raising children so we can possibly determine which of these costs should be appropriated to what expenses? I attached two pertinent pages from the USDA chart. I think what I have provided makes sense. I have also attached some more charts with the new assumptions with regard to Transferred and Duplicate expenses. I used the Betson spreadsheet and adjusted the numbers to 40% for transferred and 45% Duplicate expenses.
